- Interesting
- Motivating
- Valuable
- Well Organised
- Helpful
- Relevant
- Engaging
- Stimulating
- Enlightening
- Interactive
- Practical
- Innovative

## **The following are a selection of General Comments on the event**

Very good overall

Would like more interactive workshops

Enjoyable day. More varied than expected. Less on wound care than would have liked. Varied level from highbrow dermatology to basic pressure relief

Very enjoyable and interesting day. Interactive and good approach

Dr Hannah Wainman – excellent presentation. Very informative and found it beneficial. More talks would be valuable at future planned events

The conference is well organised and to the point. Well done

Super day, thankyou

Could be given more links to websites which might provide directions when we go back to our trusts and come across new wounds

A regular update is essential to keep updated with ever changing strategies

Dr Hannah Wainwright presentation really informative and interesting, by far the best of the day.

Struggled to see relevance to Stem to Stream felt was too much. I would have preferred the afternoon sessions in the morning

Dr Hannah Wainwright won the highlight of the day – really inspiring. Not sure why Adam Crizzle took most of the morning as it was not relevant

Enjoyable day thankyou

I thought Dr Wainwright was excellent

I took part in the recent webinar – much prefer live event with interaction

Overall course was a bit long. However, it was interesting. More practical learning would have been good

Very well thought out and organised well done

Clare Mustoe – excellent presentation, found very interesting

Great venue – appreciated being able to park easily. Great lunch as well

Would like to attend a future conference – very interesting and informative day

Overall excellent. Great to meet with others working in different professional environments. Friendly, personable, informative and felt welcome

Wound Management could have done with being longer
