To book a place please contact Jayne Allchurch email [info@wcauk.org](mailto:info@wcauk.org)  
or Telephone **07938 556066**

**We look forward to seeing you all in Worcester**

## **The following are a selection of General Comments on the event.**

- Thank you. Lots to think about and implement in practice
- Would prefer smaller group talks with interventions by reps including teaching on products e.g. stockings how to apply
- More audience/participant participation
- Really enjoyed – thank you
- I find the ‘skin care essential’ session a bit slow. I would have preferred the interactive session to be more informative from the presenters and then ask participants how they would treat it
- Very good day. Obviously, each subject is so immense that it could be discussed all day, but particularly dressing session could be longer and give more examples and maybe more interactive
- Public address system problematic – yet again
- I think the filming of the event may have impacted on audience participation
- Quality of photographs poor. Difficult to see
- Good day a lot of information to take in. It should not go on for so long as a lot of people left during the day
- Thoroughly enjoyable, great day, very informative
- A really informative day which will help me in my training, thank you
- I have found the day extremely interesting and very informative. I have really enjoyed it and can’t wait to put what I have learnt into practice
- Handouts would have been useful and examples of different dressings
- Excellent session but a bit rushed at the end
- Leg ulcer assessment could have been longer it was very informative. Really enjoyed the case studies at the end and could relate to practice – this was a great way to use knowledge gained
- Have been out of wound care for a long time, so needed the information to move forward in my new role
- As a student nurse who has not previously come across a lot of leg ulcers and different dressings I found this day very useful
- Arrange visits to universities by WCA staff as students would benefit greatly from this
- As a student nurse at Swansea University I would love to have similar presentations when learning about wound care. I think a ‘Wound Care Day’ would be greatly welcomed by the university and nursing students. As a third year preparing for management, I will take a lot of this information with me into clinical practice
- As a student nurse this conference has been very beneficial. There are many things that I am able to take back to my placement in the community
- 45 minute topic areas was a good length of time. An excellent update. Thoroughly enjoyed and feel my practice will benefit definitely
